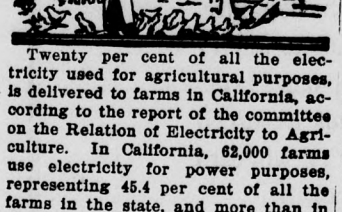
California Ranch News



Twenty per cent of all the electricity used for agricultural purposes, is delivered to farms in California, according to the report of the committee on the Relation of Electricity to Agriculture. In California, 62,000 farms use electricity for power purposes, representing 45.4 per cent of all the farms in the state, and more than in any other two states.

Dairymen of California spend more than $50,000,000 a year for feed, according to Prof. S. W. Mead of the Division of Animal Husbandry, University of California. With the day of cheap feeds gone forever, Prof. Mead says the University is working to develop new knowledge that will make cheaper feeding stuffs available. The nutritive value of five fruit by-products has been determined in the last two years, one of which, orange pulp, has saved agriculture more than $100,000.

Price statistics do not support the common belief that industry can not be prosperous unless agriculture is also prosperous, but show on the contrary that business and manufacturing activities have at times been profitable in periods of low agricultural prices.

The Southern California pear industry largely confined to the Antelope Valley, is not to have a very profitable season, according to present prospects. The condition is a few points above that of last year, but not as promising as was first hoped for. One large grower places the Antelope Valley condition at 50 per cent of normal, although other growers are more optimistic. The pear set at Tehachapi was very good, and if the fruit sticks on, the crop is expected to be the best in several years. The pear crop in most other sections of Southern California is rather light.

Although the past winter and spring has been an unusually wet one, officers of the Modoc National Forest report that the timbered areas at the lower elevations are becoming quite dry, due to extremely warm weather of the past ten days. About half the force of summer rangers have already assumed duty on the Modoc forest and the balance of the summer fire protection force will go to work July 1st. Eli Dale, veteran lookoutman of the forest service, assumed duty at the Happy Camp Lookout Point on June 16th.

Hot weather in the East brought joy to the orange growers of Orange county. The Valencia crop in the county is larger this year than it has ever been before, according to officials of fruit exchanges in both the northern and the southern sections of the county. It is estimated that the shipments of the season will total over 12,000 carloads. Sizes are small in most groves this year.

More than 4000 acres are devoted to the production of nursery stock in California, and the output last year had a value of nearly $3,000,000. This is shown in a report compiled by Everett L. Smith, superintendent of nursery service for the state department of agriculture. Growth of ornamental stock occupies the greatest attention of the nurserymen, 1704 acres being thus devoted. Deciduous trees occupy 888 acres; bulbs,497 acres, and citrus trees, 314 acres. California now has 1629 registered nurserymen, as against 1528 n 1926. Six hundred reside in Los Angeles county.

Placer county cherries have been averaging from $1500 to $2000 per car more on the Eastern market centers in 1927 than they did in 1926, and good quality Beauty plums are bringing excellent prices.

A city farm center, to be known as the Business Men's Farm Center, has recently been organized at Santa Ana, with regular business meetings each month. A program of agricultural interest is arranged for the members who are farm and orchard owners as well as business men.

The annual Poultry Short Course given at the University Farm at Davis, is announced for October 3 to November 11, by Dr. W. A. Lippincott, head of the Division of Poultry Husbandry, University of California. The course will cover as completely as possible the more important phases of the poultry industry.

Directors and members of the California Canning Peach Growers' Associtaion have announced $30 per ton for firsts and $15 a ton for seconds as the base prices for the 1927 crop of clingstone peaches.

Golden State
News of Interest to All

A new effort to have the theory of evolution taught in the public schools of California as an established fact has ended at naught. A plea on the part of Maynard Shipley, president of the Science League of America, that the state board of education rescind its action of a year ago when it ruled that text books dealing with evolution must treat the subject only as a theory, was denied by the educators in session at San Francisco last week.

Frank G. Snook, superintendent of the motor vehicle department has advised motorists and traffic officers that cars equipped with magneto-operated headlights without the use of a battery wil be banned from the State highways after September 1. The ban on machines so equipped was enacted by the 1923 Legislature, the time elapsing since then having been given to permit owners to re-equip their cars.

The fine collection of relics, rare antiques of the San Joaquin valley and its pioneers, gathered by Dr. Frank Griffith of Hanford during fifty-four years, is now in the basement of the Municipal Auditorium of that city, labeled and classified. It was purchased by the Exchange Club of Hanford, it is understood at a cost of $1500 and the city council furnished, free of rent, display space for the exhibit.

Attorney-General U. S. Webb has granted permission to Deane F. Swindell and Lois A. Swindell, Los Angeles, to bring suit against Los Angeles authorities to test the legality of the annexation proceedings and election by which the 3848-acre Sunland addition was joined to the city last year. Of the new acreage annexed under the proceedings, 1181 acres lie within the exterior borders of the Angeles National Forest.

Bold knights of the citizen's military training camp at Del Monte will engage in tourney, twentieth century style, July 23. For the benefit of hundreds of spectators, expected to be present Visitors' Day, that date, students at the camp will present a military tournament. They will strive against each other in competitive events which will include military formations, exercises, races and other forms of training taught at the camp.

For the second time in two years the R. O. T. C. unit of the University of California at Los Angeles has won distinguished college honors from the War Department, which gives the institution a standing equivalent to that of West Point.

Although the season has yet experienced no forest fires of serious consequence, grain crops and pasture lands have suffered considerable losses in various sections of the state. A wheat and barley field near Woodland was destroyed with a loss of $40,000. 46,000 acres of pasture land near Gustine, Merced county were swept by flames. Thousands of quail perished in this fire. 15,000 acres of grass, valuable for cattle, were destroyed near Walnut Creek, Contra Costa county. A loss of $15,000 was sustained when 500 acres of wheat and barley in Sutter county were burned in a fire started by sparks from a tractor.

Lack of surface water is given as a cause for the dwindling quail population of the state in protected preserves by Dr. Joseph Grinnell, curator of the museum of vertebrate zoology at the University of California, and editor of The Condor, popular bird magazine. Dr. Grinnell in a survey of the southern part of the state where water is scarce anyway, has found that practically every spring and surface flow has been tapped for domestic consumption. As a result, young quail which must be within 400 yards or walking distance of water, within a few hours of hatching in order to live, usually die.

Although one of the smallest counties in the state, Orange county, because of its intensive agricultural and industrial development during the last few years, is now fifth in the list of the state's richest counties.

Approximately $1,600,000 has been appropriated by the Federal government for work on the highways of the northern portion of the Sierra Nevada Interpark route, and it is hoped to complete the road through from Edison to Yosemite Valley by 1930.

A school to cost $15,900 will be erected this summer in La Verne, Los Angeles county, for Mexican children of the region.

Inglewood, Los Angeles county, is to have the first home in the country solely for the housing and care of disabled and indigent school teachers, if plans sponsored by the Inglewood Chamber of Commerce at the suggestion of Mrs. Helen M. Murphy, an Inglewood teacher representing the teachers' welfare committee of the California Teachers' Association, southern section, are successful.

To begin Work on Redwood Park Road

Construction of the fire escape road to provide a new outlet from California Redwood Park will start tomorrow, and it is hoped the work will be completed by early fall.

This announcement was made today by State Forester M. B. Pratt, who declared that Deputy Forester W. B. Rider has left for the park to supervise the start of construction.

Under a survey just recently completed by E. D. Rogers, a surveyor employed by the park commission, the road will run from Governor's camp to a connection with the Garzas creek road, a unit of about 4½ miles, and will cost in the neighborhood of $15,000.

The work will done under the supervision of the California Redwood Park Commission, with W. H. Dool, park warden, supervising, and J. D. Whilner of Boulder Creek acting as foreman of the road gang crew, Forester Pratt stated.

Construction will be rushed, Pratt said, to permit the opening of the road this fall, and the superivsors of San Mateo county will spend approximately $10,000 in repairing the Garzas creek road.

Funds for the park road were included in the new State budget as a result of the efforts of members of Santa Clara county's legislative delegation. Senator Herbert C. Jones of San Jose and Deputy Forester Rider have held several conferences recently mapping plans for the work.

Man Drinks Poison Booze; To Hospital

Gabriel Ritchie of 1507 Steiner street, San Francisco, returned to his home yesterday after spending some time in the Los Gatos Hospital. Sunday Ritchie was driving through Los Gatos with a party of friends when he became ill. His friends left him at the Southern Pacific station here, to board the next train back to San Francisco.

Ritchie, however, had been celebrating the "Glorius Fourth," and made such a distrubance in the railroad station that Agent R. L. Cary called Marshal Baird who placed Ritchie in custody until he sobered up. A short time later Marshal Baird noticed that the man seemed to be paralyzed. On investigating it was found that he was unconscious.

A doctor was summoned who stated that the man's condition was serious, possibly a case of wood alcohol poisoning. A Place ambulance was called, taking Ritchie to the hospital where he was given treatment.

Ted Howes Weds

Wilbur Howes and wife visited his relatives ni Union district last week. He was married in Los Angeles, June 29, to Miss Ada Walin of that city.

Wilbur is a teacher in the city schools at Vnice and after his honeymoon trip will be at home in Los Angeles.

Best wishes go to them from their many friends here and there.

Kainchi Kachi, connected with the agricultural department of the Japanese government at Tokio, has been studying reclamation methods used by the Imperial Irrigation District in Imperial Valley of late. He has also been much interested in all agricultural work here.

William R. Stay will be head of the Federal-State grape inspection service at Fresno during the shipping season beginning about July 15. He was second in charge of the service last year, assisting Samuel Preston, who resigned to enter the fruit business.

The total shipment of lemons from Central California for the season which ended in May was 291 cars, or 101,268 boxes, with an average return of $2.95 per box.

Estimates of the probable production of grapes in California this year, obtained from authoritative quarters, place the crop at a figure slightly less than last year's 2,040,000 tons. Slow growing weather, cool days and nights and rain, delayed the crop, making prospective maturity one week late, instead of two weeks ahead of normal as was the case last year.

JOHNSTON-PARDEE

At a quiet ceremony which took place Thursday evening, June 30, Miss Norma Winnifred Johnston became the bride of John N. Pardee. The couple were married by the groom's father, Rev. J. J. Pardee of Campbell. Only the immediate relatives and a few close friends of the young couple were present at the ceremony which was at the First Methodist Episcopal Church, of Sacramento.

The bride was attired in a simple frock of imported crepe in a shade of wood, with pleats at the front of the skirt, and blouse to lend the effect of a two-piece frock. Her small hat of crocheted straw matched her frock, and her smart oxfords were of two tones.

After a reception, Mr. and Mrs. Pardee departed for an automobile trip to the Gold Lake country of the High Sierras. on their return they will make their home at 1441 Fifty-first street, Sacramento, where they have purchased a home.

Mrs. Pardee is a daughter of Mr. and Mrs. John Johnston of Galt, a prominent family of that district. She is a graduate of the Sacramento High School and of the San Jose State Teachers' College, where she was a member of the Allenian Club.

Pardee is a son of Rev. J. J. Pardee of Campbell. He is a graduate of the Campbell Union High School and is office manager for the wholesale stationary firm of Gardiner, Ehmann and Kohler of Sacramento.

Mrs. Pardee and Miss Margaret accompanied Mr. Pardee to Sacramento to witness the ceremony.

NEW OFFICERS REIGN

The new officers of Ada Rebekah Lodge of Campbell were installed at the regular meeting held Tuesday evening. The work being in charge District Deputy President Viola Brown and staff of Santa Clara. The officers are:

Past Grand, Etta May Eddlemon; Noble Grand, Hattie Gardner; Vice Grand, Helen Johnson; Recording Secretary, Lillian Ohlne; Financial Secretary, Sarah Byrnes; Treasurer, Ellen Snow; Warden, Louise Castalletto; Conductor, Mirian Skiff; R. S. N. G., Hazel McQueen; L. S. N. G. Myrtle Johnson; R. S. V. G., Jessie Silberbauer; L. S. V. G., Martha Phelps; Pianist, Minnie Wehmeyer; Chaplain, Alice Hutchins; Inside Guard, Catherine Gullick. Outside Guard, Walter Siberbauer; Trustee, Emma Main.

The past president was presented with the jewel of her office by Mrs. Lucy Smith, who in turn, was presented with a past grand pin from the lodge by Mrs. J. H. Campbell. Mrs. Smith recently completed ten years as a most faithful secretary.

The officers and degree team presented a remembrance to the past grand. A banquet followed the ceremony.

Consolidated Will Meet at Mt. View

Several pertinent factors of interest to the entire county will be discussed and decided upon at the next regular meeting of Santa Clara County Consolidated Chambers of Commerce to be held at noon in the new Women's Club house on Castro street, Mountain View, next Tuesday, July 12.

Policies concerning a Statewide and a county prune Week in November, Santa Clara county's participation in the State Fair at Sacramento in September, the Stanford Summer School for Chamber of Commerce Secretaries to be held July 17 to 23, co-operation with the Pacific Highway Association, purchase of property in Dodfish Canyon for use as a county park, and the future of junior colleges in the county will be the subjects to be considered at this meeting, according to Wendell C. Thomas, president.

Will that third party be a drinking party or a dry affair?

BAUGH-WELLS

Miss Helen Baugh, and Mr. Walter Wendell Wells of Culver City were united in marriage Tuesday, July 5, at an informal church ceremony.

Rev. James Whitaker, an old family friend, read the service which was held in the Centella Methodist Church at five-thiry o'clock, only members of the family being present and a few intimate friends.

The bride was very attractive in an imported gown of blue with picture hat and shoes to match and carried a shower bouquet of Cecil Bruener roses and ferns.

A daintily appointed wedding supper was enjoyed in one of the private dining rooms of the Hotel Sainte Claire. The center piece was a beautiful basket of flowers composed of lovely corsage bouquets which were presented to the ladies of the party, and the boutonaires, which covered the basket handle to the gentlemen.

Out of town guests were Miss Emily Guinn, Miss Baugh's roommate for several years, and Galen Holbert, who accompanied Mr. Wells from the South.

Mr. and Mrs. Wells left by auto for a motor trip north into Oregon and possibly beyond, but Mr. Wells work calls him back by the last of the month. They will stop in Campbell for a few days on their return journey.

The bride is the daughter of Mrs. Hattie Baugh and has spent her vacations and many weekends here for the past few years while she has been one of the valued teachers of the Oakland schools.

Mr. Wells is an electrician and handles that branch of the work in the filming of moving pictures made by "Our Gang" and it is the production of another of these popular films that calls him back to Culver City.

The many friends of the young people here and in other places extend their sincerest good wishes for their happiness and prosperity.

NEW LAUNDRY FOR CAMPBELL

Campbell now boasts of a new growing industry that bids fair to become a popular addition. A new laundry has begun operations and before the arrangements were completed several jobs had been delivered. Mr. and Mrs. George Barnes have installed a new electric washer and Mangle and the finishing touches will be done today to give Campbell an up-to-date wet and dry wash laundry.

Many of our townspeople have long expressed a desire for a local washing concern and their wishes have come to pass.

For years laundry wagons have come from the surrounding towns to collect Campbell's soiled clothes and bring them back cleaned.

Mr. Barnes plans to "fetch and carry" the laundry work of his plant to accommodate his patrons All family washes will be done individually and special attention will be given all colored clothes to preserve the colors as far as possible.

This personal and convenient service which will prove a boom to the busy housewives during the fruit season, is located on North Central avenue, at the I. Zion place.

NEW STANDARD OIL MAN ON THIS JOB

H. H. Forester who has been local agent for the Standard Oil Company has left that company and his successor is H. M. Gruwell.

Mrs. Forester and little son who have been visiting at Reno are home again and were accompanied by Mr. Forester's mother, who will remain with them for some time.

TRAFFIC LAWS TOLD BY FRANK CAMPBELL

Frank Campbell of San Jose, attorney for California Auto Association gave a very interesting discource on the State traffic laws and observance before the Kiwanis Club Tuesday noon.

There are 25 millions of autos in the world and 90 per cent are in the United States.

Of all the accidents 75 per cent take place at intersections and of these practically all would be avoided if drivers would use ordinary prudence. According to the present law the car entering an intersection zone from the right has the right of way, but an accident may be averted if the driver yield his right to the other man. The simple rules are most important and when observed oftimes saves much trouble and expense.

The driver should always signal his intentions at least 50 feet from the point where the actual speed or direction is to be altered. In case of accident a complete notation should be written of all circumstances, facts, damages, injuries and names of witnesses.

Ben Curry, chairman, gave an interesting reminiscence of his early mining days when twenty-five cents was small change. He got his pockets full of dimes on one visit to San Francisco because he was ashamed to hand out the "short bits" for his purchases.

The Campbell Club gives the program at the San Jose luncheon Monday. President "Tac" Cutting will be chairman and talks will be given by C. H. Whitman and Rev. Jos. Bennett. Antone Bonaccorso will sing a solo and in duet with Miss Hazel Johnson of San Jose.

Tuesday Mark Purmort will act as chairman and Rev. Mark Rifenback of Trinity Church of San Jose will give the address.

BURNS-FELLMETH

The home of Mr. and Mrs. James Burns was the scene of a pretty wedding last Thursday evening when Edna M. Burns became the bride of Thomas H. Fellmeth of San Jose.

The rooms were attractively decorated with an abundance of flowers and greenery. The Rev. Mark Rifenbark of Trinity Church, San Jose, performed the ceremony in the presence of a group of relatives of the young people, who later enjoyed a delicious wedding supper at which thirty-four were seated.

The bride was gowned in white georgette with wreath and veil and was attended by Miss Catherine Aldrich and the groom was accompanied by Myron Fellmeth.

Miss Burns has grown to young womanhood in Campbell, attending local schools and has been employed for some time in San Jose.

Mr. Fellmeth is a valued employe of the San Jose post-office and after their return from a trip to Yosemite they will be at home in a modern new house now being built in East San Jose.

Campbell friends join in extending best wishes.

P O CLOSED FOR MAIL MAKE-UP

During the busy summer season it will be necessary to close the windows of the post-office during the distribution and make-up of the eleven o'clock mails. Patrons will please bear this in mind and plan their visits accordingly.

This class of office is entitled to close for each incoming mail but every effort is made to serve the public without. However, in order to have the mail distributed by the noon hour when so many call, it will be necessary to close the windows at that time.

This is case where the few may have to suffer some inconvenience for the benefit of the many, but it will be no longer than absolutely necessary.

WATCH OUT FOR CHILDREN

Vacation time is danger time for children, says the California State Automobile Association in a warning to motorists to watch for children in streets and an appeal to parents to keep children off public thoroughfares.

If it were not for a campaign and an election every so often this country could get along fairly well.

Jesse Hayes who arrived last Thursday from China visited his parents Mr. and Mrs. S. L. Hayes on Friday.

Mr. and Mrs. S. N. Hedegard and family and M. S. Hedegard spent the week-end at Capitola occupying their cottage.

A coupon book always has a sad ending.

THE OLD STORY

If the editorial column of the PRESS contained nothing but words of caution to motorists in each issue a service worth while would be rendered to our readers. It used to be "the motoring public" that came in for a scoring after some of them known as auto drivers had been "scorching," which was the old word for speeding. But now the motoring public means practically everybody. The world is on wheels nowadays. But if everybody isn't driving or riding in a motor car, there are enough of the sane ones going at all hours of the day and night to more than make the total.

Listen to this! The Department of Commerce at Washington reports that during the four weeks ending May 21, 1927, automobiles killed 559 people in 77 large cities of the United States, the land of the free and easy! They don't begin to count the motor fatalities in the small towns and rural districts. Reports are not so easily to be had. Or, possibly they don't dare give the figures; the shock would be too great.

Naturally, like everyone else, we are wondering whether there will be some great, revolutionary change come about to control traffic and prevent automobile accidents. And if so, what will it be? Will it come about by greater mechanical perfection or by more intensive human thoughtfulness? The airplane will never quite replace the gas wagon that rolls on the ground. One-way roads and streets will help, but there will be speed maniacs who will try to pass other cars even if they have to go around through an orchard or grain field. Elimination of grade-crossings will come, but not until the expenditure of enough money to finance a first-class war. Four-wheel brakes have helped. A speed-controlled car will not work, for there are times when a darting speed out of a jam or off of a track is the safer way, and besides, people won't have them.

One may continue to spectulate on all of the theories of safety and the whole subject goes back to the human element which must always be reckoned with before statistics cease to shock one's sense of safety on the highways. Brains may make safe automobiles, but the great heart of mankind combined with common sense must complete the cycle of safety at the steering wheel.

PHILIPPINE ADMINISTRATION

A change in Philippine administration has been discussed. A central bureau, in stricter nature of civil government as distinct from military control by army and navy, appears to be the goal sought.

Those who believe in continued attachment to the Philippines can not seriously object to such a plan; while many who advocate freedom for the island possessions see in the proposal a letting up of rigorous control of the United States in the far-Pacific. But whether the people of the islands know it or not, the protection afforded since the Spanish war has been of considerable value to them. It has at least made them strive for independence, and they have not been able to satisfy Washington that they would have been better off by freedom.

In some foreign circles it has been charged that the hold of the United State on the Philippines for the past quarter of a century has been as much to gain Pacific advantage for itself as it has been to lift a backward and otherwise defenseless people into a position of self-government and independence. The Filipinos themselves have maintained that domination is a national problem—almost a world problem. Whatever steps are taken should come after mature deliberation. Let us have confidence that no mistakes will be made.

HONEYMOONS ON PAYMENTS!

It is reported that a Boston tourist agency has installed a department to advance funds to honeymooners, who may pay back in "easy payments" the money spent on their trip. Obviously, the plan is to make money. Incidently, will it increase the number of marriages? To some extent it may; but love finds a way anyhow. If the husbands in Campbell were to "fess up" we'll make a friendly wager that few of them had much ready cash when they started on that long, long trail of matrimony.

That the lack of funds delays some marriages there is no doubt. But might not the installment plan makes matters worse? The unthinking nuptials—because the money is advanced and comes easily, and also because honeymoon-time is a time when thinking about economy is not on the program—might go on a longer trip and spend more money than their station in life would warrant. Then when the furniture and the vacuum sweeper, the new car and the baby carriage have to be paid for, there are those "blamed honeymoon instalments" still staring them in the face.

Keep cool during July and the rest of the year will take care of itself.

Money at Work

Money deposited in an American Trust savings account serves two purposes—it creates a reserve fund available for an emergency or for future use as planned, and it earns more money for the depositor. The days from July to July 11 offer special advantages to depositors; for funds deposited on or before July 11 will earn dividends from July 1.

Cong'l Church

Regular Sunday services morning and evening. Rev. J. H. Bennett preaching. C. E. at 6:30 p. m. Sunday. Prayer meeting Wednesday.

CHURCH NOTICE

Odd Fellows Hall, Campbell, Cal. Full Gospel service every Saturday at 8 p. m.; Monday 8 p. m. Bible study; Thursday, 3 p. m. children's Bible School. Branch of Upper Poom Mission, Fourth and San Antonio streets, San Jose. We extend a most hearty invitation to all, come.

REMOVING HUB CAPS

Place a piece of cloth over the cap when removing it, advises the California State Automobile Association. This saves it from being damaged by the wrench.

M. E. CHURCH NOTES
W. C. Robins, Minister

Sunday, July 10: "Spiritual Sustenance is neede in hot as well as in cool weather." Go to church regularly at 11:00. Rev. Geo. Southwell will preach. Don't fail to attend. You will enjoy him greatly. At 6:30, Epworth League devotional service. At 7:30, an evening of music with Miss Olive Hanger, organist, leading. Congregational singing and vocal solos. Miss Hanger an accomplished organist from College of Pacific will play several numbers.

The Sunday School meets at 9:45. There are classes for all grades. You will enjoy our opening exercises. Strangers are cordially invited to all our services and especially to our Wednesday night Payer meeting and social hour.

Cutters' cards at Press office.

Town Tales Tersely Told

Mrs. W. E. Speegle spent the past week with friends at Oakland and Pismo Beach.

The Ben Austin and T. A. Robinson families spent the week-end at Santa Cruz.

Mrs. M. A. Purmort is reported steadily improving and hopes to be out again ere long.

Mr. and Mrs. C. H. Whitman spent the holidays at Carmel and neighboring coast points.

The J. C. Soutar and H. W. Pratt families have been camping in the Big Basin this week.

Mrs. O. A. Putnam visited at the State Rural Letter Carriers' Convention at Haywards Monday.

Mr. and Mrs. Anders Larsen enjoyed a hiking trip from Lexington to Boulder Creek Wednesday.

Mr. and Mrs. G. C. Archibald and children drove over from Modesto and spent the week-end here with relatives.

Mrs. M. Dunphy and Miss Harriet are down from San Francisco and will spend two weeks at their ranch on Los Gatos Road.

W. C. Robins, pastor of the Methodist Church, and wife left early last Tuesday a. m. for a two weeks' visit at Glendale, Los Angeles and Pacific Palisades. They will return about the 22nd.

The A. W. Johnson family are moving into their attractive new home on Alice avenue this week. R. W. Castor will occupy the Whitman cottage on N. Central which Mr. Johnson is vacating.

Mr. T. L. Mendel returned Wednesday from a very delightful trip to British Columbia and by the "inside passage" to Alaska and return. He reports a very pleasant time and was greatly benefited by the rest and voyage.

Miss Lucy Joy has recently entered Mercy Hospital at Council Bluff, Ia., after a graduate course in the East. Miss Alice Joy expects to leave here about July 15 and will visit her sister, planning to go on East and probably take a year's study at one of the larger universities there.

W. E. Speegle, box and tray contractor, was in San Francisco on business and incidentlly secured a big box making contract at Medford, Ore., He now has a large crew of men making boxes and trays on several big jobs at various points in the State. His men have practicall ysteady work by moving from place to place.

FLAGS AT SMITH'S.

Cutters' cards at Press office.

Ray Hulsman spent a very delightful week-end on the Russian river.

Geo. Ingram of the Leavenworth Grocery returned last week from a visit in Yosemite.

Mrs. P. T. Ortman has returned from Eureka where she had been visiting for a few weeks.

The Jan Kalas family were among the many visitors in Yosemite over the Fourth.

The D. H. Cramer family returned Tuesday from a very pleasant outing in Yosemite.

The A. V. McCarty family with San Jose friends left Tuesday for the King's River country to spend the remainder of July.

Mr. and Mrs. C. H. Antrim and children came up from Fresno to spend the holiday week-end with Mrs. Lena Rodeck and Miss Mary.

Warren Eddlemon and Lawrence Ferro who spent the holidays in Yosemite reported the place as so full there wasn't room to pitch a tent left in the camping grounds.

Mr. and Mrs. Geo. R. Stray drove up from Bakersfield Tuesday night to spend their vacation here and at the Stray cottage at Forest Springs in the Santa Cruz mountains.

Mr. and Mrs. Wm. Beal of Fresno are visiting Mrs. Beal's aunt, Mrs. George N. Stray. They were former residents of this vicinity and have a number of friends here.

Mrs.Olga Weiss, ex-school nurse, left Friday to spend a few days with friends at Morro Beach and Taft before going to Colorado to prepare for her new line of work.

Jas. T. Allen and family of Sebastopol are here for the summer. Mr. Allen who is attending the the State Teachers' College was a former teacher in the Campbell Union Grammar School.

Conrad Graiser, president of the Campbell Congrational Intermediate Christian Endeavor Society won first place in the intermedite poster contest in Santa Clara District Union and also at the State Convention at Santa Ana.

Mrs. E. C. Merrill who had been in the Palo. Alto Hospital since her return from the Yosemite was brought home Saturday. She is in a plaster cast to keep her spine from moving and later will graduate to a brace. Her many friends and acquaintances extend their sympathy and best wishes for a speedy relief of her suffering.

An Alumna Writes of the School Bonds

Far down in the desert the happy news came tous that Campbell was voting on bonds for a new high school building. Now Coalinga feels very closely akin to Campbell educationally, what with one Geer, two Fablingers, one Davis, one Robson, and two Joys as connecting links. We think of Campbell as a forward-looking community in which, as in Coalinga, the welfare of the children takes first place. Coalinga once voted down a proposition for an improved water system, and once to support a community band, but she never yet has refused money for school improvement. So imagine my surprise on learning that Campbell, our sister in education, had failed to adopt this bond issue! On my return to Campbell I started out to discover why. I have talked with people in all walks of life and various degrees of education and of wealth, and four out of five say:

"Oh, we want the new school buildings, but we don't want to give up the old site."

That was the first I had heard of a new site, and immediately all the sentiment of an old alumnus rose in me in gratitude for such a discriminating vote.

That is the salvation of the American voter—his ability to see through a measure, and his dogged refusal to vote for what he doesn't want just because it is tied up with a good thing.

Judging by the comments I have heard, it would seem safe to predict that a new measure, calling for new buildings on the old site and for the purchase of some additional land nearby, would carry easily.

What dearer sentiment is there in a community than the love of grown-up children for their old school? Modern improvements in school architecture make it hard to keep the old buildings however beloved may be the forbidden balcony or that particular corner of the old library! but the ground, the trees, the shrubbery are growing things which age can hallow only and improve. "The Campus," what a host of vital memories cluster round that word! To move a school from place to place is to destroy much of its tradition and require the building of a new background.

Something of this feeling must have been in the minds of those who proposed the new site, for it was provided that strip of land bearing the Redwood planted by Rooseveldt in '03 and the Pine dedicated to Professor Smith be retained as a park.

But what of the Class Trees, dear to hosts of alumni, and of all the shrubbery, sacred in every leaf to Grandpa Fablinger? What of the old Pepper trees, last relic of the little attic high school of the classes of '01,'02 and '03?

There is another consideration no less noble in sentiment than this, and much more tangible to the hardheaded business man or woman. "Community Planning" is the latest word in civic progress. A modern city shoould be laid out as from an aeroplane, with great axes, careful balance, and co-ordination. Campbell has the beginning of such a lay-out. Its industrial district extends with yearly increasing sightliness along the railroad. The business center, comfortably concentrated, comes next. Binding business and home life are the churches, clubs, and library. Follows the residence district, and then at the far end, slightly isolated, like a bit ofidealism pointing to the hills, comes the educational unit. The grammar school has made a great beginning. Its spacious forecourt and warm, rich coloring are reminiscent of all the dreamy glory of the Panama-Pacific Exposition. What an opportunity for the high school across the street to complete that glorious promise! The two corners, worked out in harmony, would lend to Campbell a distinctive beauty equaled by few cities of many times her size.

I write as a taxpayer of this community, and one to whom Campbell is and for twenty-five years has been home. Only if those who voted so wisely and bravely be as brave and wise with their words and express their desires clearly, may the Trustees, their faithful servants, know what they want to be encouraged to act accordingly.

Alice Joy,
C. U. H. S., '03.

Golden State

News of Interest to All

California with Northern California taking the lead, is represented at the Nevada Trans-continental Highways Exposition in a great exhibition of the resources of the Golden State at Reno. The beautiful California Building was found inadequate to meet the demands for space, with the result an annex, a great blue and gold tent, was added.

Resoration work at the San Juan mission is progressing satisfactorily. Fifteen-inch walls are now up to the second floor level. Floor laying is in progress and the building will be practically completed by the last of September.

The interstate commerce commission received formal notice last week that construction on a new sixty-one mile line of railroad, connecting Cornell, Siskiyou county, Cal., with Alturas, Cal., began June 14th. Alturas is a point on the California-Nevada-Oregon Railroad. Permission to undertake the construction was granted several months ago. When the line is completed it will give the Southern Pacific Company, which controls the Central Pacific Railroad, a through line north from San Francisco into Central Oregon.

Lawrence Abbey of Porterville employed by the Southern California Edi-Company as a lineman, received 11,000 volts of electricity and lives to tell the story. While painfully burned on the right hand and right hip, Abby suffered only the inconvenience of a few days in the hospital.

Five crews have been sent to traffic centers of the state in opening a state-wide campaign against overloaded trucks, by the State Division of Motor Vehicles. This number will be increased later in the year, says Frank G. Snook, chief of the division. These crews will have headquarters in the following cities: San Jose for the south coast counties; Fresno for San Joaquin valley; Sacramento for Sacramento valley and Northern Sierra Nevada regione; Ukiah for north coast counties and Santa Ana for Southern California.

Atop the Merced Exchequer dam, Lake McClure was dedicated June 26 to the memory of Wilbur Fisk McClure. More than 100 engineers and their friends from Sacramento, Stockton, San Francisco, Fresno, Los Angeles and other points, journeyed to the Merced Exchequer dam to participate in the ceremonies and asisted in placing a bronze plaque which bears the following inscription: "Lake McClure, named by Merced Irrigation District in honor of Wilbur Fisk McClure, 1857-1926." State engineer, 1912-1926. In appreciation of his lovable character and in recognition of his engineering service in the advancement of irrigation in California."

Hundreds of spectators, including newspaper men, camera men and engineers from throughout the West, gathered on a hillside in the Tehachapi valley last week, saw an entire mountain lifted into the air and dropped, a crumbling mass, when the Monolith Portland Cement Company fired the largest charge of dynamite ever placed in a cement quarry in the United States. One hundred tons of dynamite was exploded under the mountain, which will supply the kilns of the cement plant for another year.

Assailing the intricacies of jurisdiction, which have brought about a serious neglect of the health, education and general well-being of the 17,000 Indians in California, the State Department of Public Welfare, in a report recently made public, declares that the Indian problem is an ordinary but much neglected social problem, which calls for carefully planned constructive social service for immemediate improvement.

Victim of a living death, Mrs. Clara Drummond, 20, of Fresno, has completed the thirteenth week of a strange coma that has attracted nation-wide attention. Her condition has not changed since April 4, when she was discovered unconscious in a gas-filled room at her home. Medical science has done all in its power to break the strange coma, which points, according to doctors who have been treating her, to certain death. At the County General Hospital she lies inert, breathing, but that is all. Physicians are certain that she is suffering from gas poisoning. Mrs. Drummond has stubbornly clung to life for more than 2000 hours in a semi-comatose condition, although she is unable to eat, speak, hear, see, move her limbs or body. She is forcibly fed through the nostrils with peptonized milk and orange juice.

Mr. and Mrs. C. B. Miracle returned from Lake Tahoe Tuesday Mrs. Miracle will substitute in the post-office during the absence of H. C. Smith who, with Mrs. Smith will leave today to attend the State Press Association excursion to Lake Tahoe and the National Highway Exposition at Reno, Nevada.

Miss Dorothy Merriman was elected Junior Superintendent of the California Endeavor Union at the recent State Convention in Santa Ana. Miss Merriman is well qualified for this position, having successfully served the Santa Clara District Union for three years as Junior Superintendent and two years as president.

A. Baranoff, 57 years of age, said to have the title of Count and to be a member of one of Russia's old noble families, died at Silver Lake last week as a result of heat prostration. The asserted nobleman, accompanied by two Los Angeles business men, entered Death Valley to look over some prospective mining sites. They became lost and were forced to remain out in the desert during a whole day without water. After locating water, Baranoff is said to have consumed too much and became ill. His companions took him to Silver Lake. There he became prostrated and died. He was buried at Silver Lake by his companions.

For the purpose of transferring a surplus fund, now in the special sewer-construction fund, in order that the money may be made available for construction of a municipal playground and swimming pool, a municipal election will probably be called in Tulare at an early date.

California Ranch News

According to W. I. Tibbs, crop prospects in Kings county, are excellent and good crops of alfalfa and of grain hay have already been harvested. Fruit of all kinds promises an abundant yield, particularly grapes, peaches and plums. Tibbs has a fine orchard of Santa Rosa plums, which will be ready to market the latter part of the month and promises a particularly fine quality of fruit and a prolific yield. With pasturages excellent, dairy prospects were never better.

Exhibitors at the horse show to be held at Stockton in conjunction with the San Joaquin County Fair, August 23rd-28th, will compete for awards amounting to the sum of $23,500. The Stockton Horse Show is attracting exhibitors from all over the Pacific Coast and Middle West.

Owing to arrangements made by the Yuba City Milling Company with the state railroad commission, the farmers of the Yuba City region will have their choice this season of storage of grain in warehouses, sacked or in bins in bulk. Large tanks have been installed by the company for the reception of grain in bulk. From these tanks the grain may be easily loaded into cars on a spur alongside. While being conveyed to the tanks the grain is automatically cleaned.

B. F. Stroup, Shasta county horticultural commissioner, has filed his semi-annual report with the Shasta County Board of Supervisors. During this period he has inspected a total of 836 shipments of trees, vines and plants. Stroup urges a continuation of squirrel eradication work in the districts where past work has been done. He plans to secure at least one good clean up of the remaining squirrels during the season and prevent reinfection. In puncture vine work Stroup has obtained the co-operation of the Southern Pacific Company whereby the work along the company's right-of-way is being done under his supervision, and ranchers on whose lands the vines occur are working with Stroup to secure the control of the weed.

Tulare county's foothill Navel orange are undergoing a heavy June drop at this season of the year, and indications in the Woodlake and other foothill districts indicate that the crop will be but from 60 to 70 per cent normal. Trees bloomed in the foothill regions earlier than usual, but were struck first by warm weather and then by cold. This is believed to have affected the bloom. Some sections of the county that were not hit so badly by frost have a good crop.

Southern California's output of powdered milk will shortly be increased 10,000 pounds a day by the production of the Crescent Creamery Company's new plant at Tipton, Tulare county.

Cutters' cards at Press office.

We can't understand how ill health can drive one to suicide, because after you've done that you won't have any health of all.

Home Preserving now cool and easy

Home preserving is so easy when you have a new Gas Range. For its Oven Heat Control is the secret of fine easy preserving. Freshly cleaned fruit, for example, is packed right in jars and put into the oven. You merely set the Oven Heat Control and steady even heat preserves the fruits' firmness, its delicious fruit-flavor and color. No lifting of boiling kettles. No watching. The kitchen stays cool.

These new Gas Ranges equipped with the Oven Heat Control can be seen at the dealer's store or at our office.

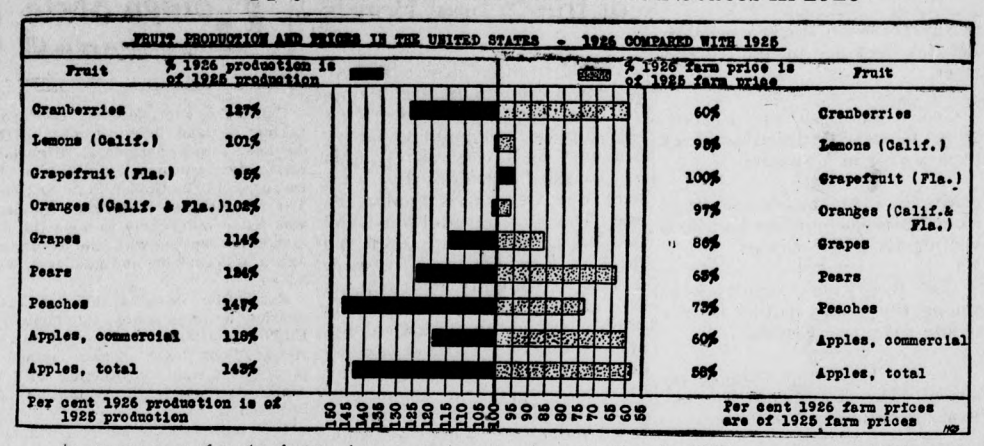
PRODUCTION AND RETURNS
Fruit Supply and Prices in The United States in 1926

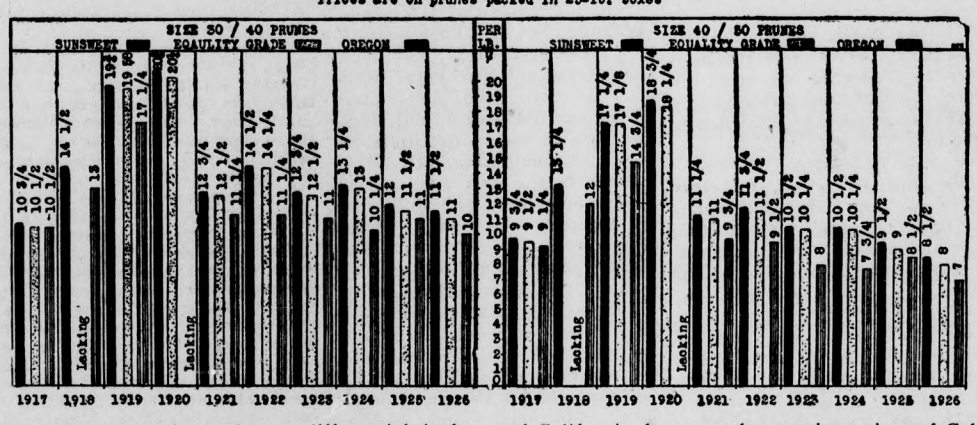


FRUIT PRODUCTION AND PRICES IN THE UNITED STATES - 1926 COMPARED WITH 1925
Fruit
% 1926 production is of 1925 production
% 1926 farm price is of 1925 farm price
Fruit
Cranberries 127% 60% Cranberries
Lemons (Calif.) 101% 98% Lemons (Calif.)
Grapefruit (Fla.) 95% 100% Grapefruit (Fla.)
Oranges (Calif. & Fla.) 102% 97% Oranges (Calif.& Fla.)
Grapes 114% 86% Grapes
Pears 126% 65% Pears
Peaches 147% 75% Peaches
Apples, commercial 118% 60% Apples, commercial
Apples, total 143% 58% Apples, total
Per cent 1926 production is of 1925 production
150 145 140 135 130 125 120 115 110 105 100 95 90 85 80 75 70 65 60 55
Per cent 1926 farm prices are of 1925 farm prices

In every case, for the fruits shown, an increased production in 1926 over that of 1925 resulted in lower prices per "unit" for the producers. The black bars show percentage the 1926 production was of 1925 production; the gray bars show percentage the 1926 unit prices were of the 1925 unit prices. Production, with demand remaining constant, certainly has a great bearing on the prices received by the producers.

OREGON AND CALIFORNIA OPENING PRICES

COMPARATIVE OPENING PRICES ON ASSOCIATION AND ON OREGON PRUNES
Prices are on prunes packed in 25-lb. boxes



There has always been a differential, in favor of California, between the opening prices of California prunes and those of Oregon prunes. This differential, however, may not become too great without interfering with the marketing of the California product. Oregon, then, when setting prices on her prunes, automatically sets a price level above which California cannot go.

Application of poisoned barley in quantities to fit in the year-round program of squirrel eradication in Tulare County has begun by the horticultural office, under the direction of Oscar Hemphill, deputy commissioner. About eighty tons of poisoned grain is mixed annually. A self-feeding hopper, which can be placed in rock piles and trees, places the barley before the squirrels at all times and effects the saving of more than one application to the section near the hopper. Young squirrels, without knowledge of poisoned grain, and who have not learned to hull barley and rid of the poison can be killed readily through poisoned grain, but the adult squirrels hesitate in eating poisoned grain, unless applied at the right season.

California's melon crop has been considerably delayed by cool weather during the latter part of May. E. F. Kauffman, federal state crop statistician, reports on the basis of information received from the melon districts. In the San Joaquin cantaloupe areas an average crop is anticipated, but the shipments will not begin much before July 10. In the Imperial valley cantaloupes of the best quality in years are being produced, but the shipments are below and later than those of last year. To date only 2,180 cars have been shipped against a total of 6,750 last season. The watermelon crop is not expected to begin moving much before July 4, and will not be heavy until a week later.

Producing 12,716,819 pounds of butter fat in 1926, Los Angeles county retained its lead as the premier dairy county of the state, according to Dr. I. J. Frey of the State Bureau of Dairy Control. The figure represents a gain of 838,524 pounds over last year. Merced county keeps second place with a production of 10,256,153 pounds as compared wtih 9,882,891 pounds the year before, or a gain of 373,262 pounds. Stanislaus is third with 9,977,487 pounds; Tulare fourth with 8,295,231 and Humboldt county fifth with 7,376,617. All the counties mentioned show appreciable gains over 1925.

San Luis Obispo sends word of an unusually good crop of almonds, perhaps 70 per cent of normal, although the other important growing district in the south, Banning, was badly hit by frost, and reliable estimates give the district but 20 per cent of a normal crop.

Declaring that the thousands of tons of melons and other vegetable products which go to waste annually in Imperial Valley contain untold wealth, John R. Hinchley of San Francisco told members of the Chamber of Commerce of Holtville that it is his plan to utilize these products in the manufacture of industrial alcohol. Hinchley appeared before the chamber to discuss plans for a canning factory which he proposes to erect at Holtville in the near future. The alcohol plant will follow later, he said. Imperial Valley's surplus products which are now going to waste, he declared, can all be converted through canning and distillation into marketable merchandise.

W. Colby passed the hat at a recent session of the association and secured a nucleus for cash prizes for the boys and girls who raise poultry despite the city edict about not having male birds within one hundred feet of a dwelling—a law which the association will work to kill. The show is to be held January 11 to 15.

Much interest is being taken in the culture of rice in the Imperial valley. The state experimental station at Meloland has been growing rice for three years, and this season farmers are growing a total of 160 acres of the grain. Rice growing is advocated by station authorities on lands where flooding is resorted to as a means of ridding the land of alkali. While this is going on, rice may be grown at a profit, it is asserted.

Bakersfield's most noted garden spot, Kern Mesa, situated just east of Bakersfield and extending for a distance of six miles, has completed its season's harvest of sweet potatoes and other crops. One hundred fifty acres were planted to the tubers, and farmers are being paid approximately $200 on each acre, in comparison with $700 last year, due to the marked decrease in demand and price for this vegetable.

BANKERS HELPING

Three banks in South Carolina have inaugurated a plan to provide free of rent for two years a centrally located place to be used by the farmers of Greenville and neighboring counties for the purpose of establishing a creamery, a canning factory and a farm woman's club. The idea is to get the farmers to raise livestock, to raise their own food and feed and to have something extra to sell. The canning factory is intended to utilize the surplus garden and fruit products, and the club rooms for getting the support and co-operation of the farm women.

Georgia bankers have made great strides in furthering a diversified farming program the past year. They induced farmers to sow fifty-five carloads of vetch seed, furnished local prizes in eighty counties for the corn contest, the state prize of $1,000 being furnished by a bank in Atlanta. A banker-farmer alfalfa demonstration was held at the college and attended by 250 bankers and farmers. Alfalfa acreage has increased from 1,800 to 5,000, the demonstration being credited with 50 per cent of this increase. This year the state has produced 12,000,000 more bushels of corn than last year, has sold 50 cars of truck, $2,000,000 worth of pecans, and has produced 150,000,000 pounds of meat and enough corn and hay for its own use.

AS LABOR SEES BANKS

Vast sums of money are lost each year by wage-earners through investments hastily entered into. With the confidence of the wage-earners, banks will be enabled to more accurately advise such investors and thus save money which might otherwise be lost by unwise speculation. — William Green, President American Federation of Labor.

More than 290 new army and navy planes are to be added to San Diego's air fleet during the fiscal year 1928-29. The aircraft squadrons of the battle fleet will get 132 new type fighting, type, bombing and scouting planes; the marine corps aviation expeditionary squadrons thirty-three new fighting and bombing planes, including two Fokker monoplanes, and the naval air station twenty-six ships of various types.

An 80 mile gale, sweeping through Bakersfield at 5 o'clock the afternoon of June 7 destroyed the airplane hangar at Kern County Airport, crushing eight airplanes and doing damage roughly estimated at $18,000. Portions of the big hangar were hurled across the state highway 50 feet to the west, temporarily blocking north and south bound traffic and tearing out a section of telephone lines.
